

### 30 years of Laser Printing : Our History

In 1977, Fuji Xerox introduced the world's first commercially available laser printer – the Xerox 9700. Today, more than 30 years later and with more than 150,000 patents, Fuji Xerox's innovations continue to shape the world of document & knowledge management. Such innovations include the proprietary Emulsion Aggregation – High Grade (EA-HG) Toner and the unique Solid Ink technology.

### EA-HG Toner – your Essential Accessory Vibrant, realistic colour output!

- Small toner particles with even diameters that produces better quality images & documents
- Oil-free toner has a low fixing temperature to reduce power consumption
- Carbon Dioxide emissions at production reduced by around 35 %

### Solid Ink

The basic principle of how Solid Ink technology works is simple; the printer melts the different coloured inks into liquid form & combines them to produce rich, glossy colour documents & photographs. The results are sure to impress.

### Insist on Genuine Fuji Xerox supplies for your machine

Genuine Fuji Xerox supplies are engineered and rigorously tested to maximise the performance of your printer engine. With Genuine supplies, you will enjoy:

- Consistent colour quality
- Value for money
- Trouble-free printing

Tests on some non-genuine supplies (refills and compatibles) have shown that there is a risk of printer damage, inconsistent page yields and inconsistent image quality. Ultimately this can lead to a higher cost of ownership for non-genuine supplies even if they are priced competitively.
